Growler Filling Rules

We have ABC (Alcohol Beverage Control) approval to fill the following size growlers 32oz, 64oz.

Growler Rules:

- We will fill any HoP Brewing Co. branded 64oz or 32oz growlers.
- Legally, any non-HoP Brewing Co. growler must have all other names, logos, and/or addresses of another brewery covered in order to be filled with HoP beer. We prefer you covering the logos with blue painters tape. This will not damage the other brewery's logo. Please do not cover growler with paper, the paper gets wet and does not work. We put our own tag on the growler stating beer style, and abv (Alcohol by Volume).
- Non-HoP Brewing Co. growlers must be designed to hold pressurized beer and must be amber colored glass or stainless steel in order to protect the beer. We will **NOT** fill any Green or Clear glass growlers.
- We will fill Flip Top and Screw Top Growlers. Flip top style growlers are the best for preserving beer carbonation and quality.
- Growlers must be "**CLEAN**". We cannot emphasize this enough. We will inspect the growlers before filling. If your growler is found to be dirty we will not fill it. We will not wash your growler for you.
- Growlers must have the Government Warning printed somewhere on the the vessel.

Any growlers that do not comply with the specifications above will simply not be filled. This is a more generous growler policy than most breweries. We reserve the right to NOT fill your growler for any reason. We would love to fill all growlers, but not at the risk of our Alcohol License and our beer quality.
